D

The diagram shows a vertical rectangle with dashed lines on the top and bottom edges. Inside the rectangle, there is a vertical double-headed arrow pointing both up and down. To the left of the rectangle, the letter 'D' is written vertically.

17D

18A

The image shows a technical drawing of a corner. A solid line forms a right-angled corner. The top edge of this corner is chamfered, indicated by a downward-pointing V-shape. Dashed lines represent the original, unchamfered edges and the hidden part of the corner. The label '18A' is positioned below the chamfered edge.

18B

18C

14E

The diagram features a large outer rectangle with a solid black border. Inside it are three smaller, nested rectangles. The innermost rectangle is defined by a solid black border. The middle rectangle is defined by a dashed black border. The outermost of these three nested rectangles is also defined by a dashed black border. The label '14E' is positioned at the top center, with a downward-pointing arrowhead. The label '15D' is positioned on the left side, with a rightward-pointing arrowhead. The label '16E' is positioned at the bottom center, with an upward-pointing arrowhead.

The diagram shows a vertical strip with a solid left boundary and a dashed right boundary. A solid line runs parallel to the dashed line, and a second dashed line runs parallel to the solid line. At the top center, a downward-pointing triangle is labeled '10 A'. At the bottom center, an upward-pointing triangle is labeled '12A'. On the right side, a rightward-pointing triangle is labeled '11A'. A vertical arrow points upwards from the bottom right towards the right side of the strip.

10C

The diagram shows a vertical shaft with several distinct sections. From top to bottom: a section with a narrow diameter (labeled 10C) defined by solid lines; a section with a medium diameter (labeled 11B) defined by solid lines; a section with a wide diameter (labeled 11C) defined by solid lines; and a section with a medium diameter (labeled 12C) defined by solid lines. Dashed lines represent hidden features, including a narrow diameter section at the top, a wide diameter section at the bottom, and a section with a diameter similar to the 11B section in the middle. A horizontal dimension line is located in the lower-left quadrant, spanning across the wide diameter section (11C) and the medium diameter section (12C).

12A

The diagram shows a trapezoidal shape with a top edge that is slightly concave. A thick solid line runs horizontally across the upper portion of the shape. Below this, there are two more solid lines, one above and one below a set of four vertical dashed lines. The vertical dashed lines are spaced evenly. At the bottom of the shape, there is a small upward-pointing triangle. On the right side, there is a small triangle pointing towards the interior of the shape. Labels '12A', '13A', and '14A' are placed near their respective features.

12C

The diagram shows a technical drawing with several lines and labels. At the top center, there is a downward-pointing triangle labeled '12C'. On the left side, there is a rightward-pointing triangle labeled '13B'. On the right side, there is a leftward-pointing triangle labeled '13C'. At the bottom center, there is an upward-pointing triangle labeled '14C'. The drawing consists of several parallel lines, some solid and some dashed, sloping downwards from left to right. There are also two horizontal lines near the top, one on the left and one on the right, and a small horizontal line on the right side.
